One of the best Numerology books on the market, and I have several. Teaches you everything in a easy to understand way. Lots of good information in this book.

If there ever is a Book That after you read it you Feel Like someone was following you all your life with a Camera for how could they know the Details of Your Personality to The Exact , I Highly recommend this Book Juno Jordan has done an excellent Job in Describing Who we are , , I still am amazed how that could be ! Yet It Is , See For yourself It is definately an Eyeopener Totally 5 Star, i hope you give it a chance ,I Did and Am So Glad I Did! Enjoy!

As a person that has done numerology for years as a hobby, this book is the BEST addition to my collection of information!! As a matter of fact, I went through my 2 binders that were 2 inches thick & threw most of it away!! Love this book!!!

This Numerology book is informative and easy to understand. Instructions are easy to follow. I'm having fun playing with this number and that to understand myself and how I interact with others.

One of the best references for numerology. I first bought this book in the 80's when I started learning numerology. Over the years I've studied and owned other books but this remains my favorite. The study of numerology requires reasonable judgement of the various interpretations and its my opinion this book teaches the best.

Great book for your learning the science of numerology. Well written and easy to understand.

This is the best Numerology book. Everyone should start with this book if they are serious about learning Numerology.

This book was so easy to follow, being a first time to numerolgy. I have done almost everyones names and am going farther, it is very interesting I would recomend it to anyone that has thought about numerology.
