# The Dog Cancer Survival Guide: Full Spectrum Treatments To Optimize Your Dog's Life Quality And Longevity

## Synopsis

If your dog has cancer, you need this book. No matter what youâ™ve heard, there are always steps you can take to help your dog fight (and even beat) cancer. This scientifically researched guide is your complete reference for practical, evidence-based strategies that can optimize the life quality and longevity for your dog. No matter what diagnosis or stage of cancer your dog has, this book is packed with precious advice that can help now. Discover the Full Spectrum approach to dog cancer care: Everything you need to know about conventional western veterinary treatments (surgery, chemotherapy and radiation) including how to reduce their side effects. The most effective non-conventional options, including botanical nutraceuticals, supplements, nutrition, and mind-body medicine. How to analyze the options and develop a specific plan for your own dog based on your dogâ™s type of cancer, your dogâ™s age, your financial and time budget, your personality, and many other personal factors. Imagine looking back at this time in your life, five years from now, and having not a single regret. You can help your dog fight cancer and you can honor your dogâ™s life by living each moment to the fullest, starting now. This book can help you as it has helped thousands of other dog lovers. The Authors Dr. Demian Dressler, DVM practices in Hawaii and is internationally recognized as "the dog cancer vet" and blogs at DogCancerBlog.com. Dr. Susan Ettinger, DVM is a veterinary oncologist and a diplomate of the American College of Internal Medicine who practices in New York. Praise from Veterinarians, Authors & Book Reviewers "The future is upon us and this ground-breaking book is a vital cornerstone. In dealing with cancer, our worst illness, this Survival Guide is educational, logical, expansive, embracing, honest and so needed."Dr. Marty Goldstein, DVMHolistic veterinarian and Host, Ask Martha Stewartâ™s Vet on Sirius Radio "The message of this book jumps off the written page and into the heart of every reader, and will become the at home bible for cancer care of dogs. The authors have given you a sensible and systematic approach that practicing veterinarians will cherish. I found the book inspiring and, clearly, it will become part of my daily approach to cancer therapy for my own patients."Dr. Robert B. Cohen, VMDBay Street Animal Hospital, New York "I wish that I had had The Dog Cancer Survival Guide when my dearly beloved Flat-coated Retriever, Odin, contracted cancer. It would have provided me alternative courses of action, as well as some well needed "reality checks" which were not available from conversations with my veterinarian. It should be on every dog ownerâ™s book shelf--just in case..."Dr. Stanley Coren, PhD, FRSCauthor of many books, including Born to Bark "A comprehensive guide that distills both alternative and allopathic cancer treatments in dogs...With the overwhelming amount of conflicting information about cancer prevention and treatment, this book provides a pet owner with an easy to follow approach to one of

the most serious diseases in animals."Dr. Barbara Royal, DVMThe Royal Treatment Veterinary Center, Oprah Winfreyâ€™s Chicago veterinarian "Picking up The Dog Cancer Survival Guide is anything but a downer: it's an 'empowerer.' It will make you feel like the best medical advocate for your dog. It covers canine cancer topics to an unprecedented depth and breadth from emotional coping strategies to prevention-in plain English.Read this book, and you will understand cancer stages, treatment options, and types, and much more. If you have just had the dreaded news, pick up a copy and it will guide the decisions your dog trusts you to make."Laure-Anne ViselÃ©Dog behavior specialist and technical dog writer, CanisBonus.com

## **Customer Reviews**

"Faced with a bewildering set of circumstances, owners of dogs with cancer will welcome this guide, which will help them calm down, think clearly, consider the options, and, ultimately, make more confident decisions." -Library Journal"This book is an incredible resource on everything cancer for dogs. Starting off with your role, common questions (why didn't my vet catch this earlier?),cancer causes, cancer care and twelve common types of canine cancers, this book is very comprehensive and definitely worth reading....Bottom line: Get it." -Veterinary Editor, About.com"At this troubling time, having The Dog Cancer Survival Guide by your side is like having both a knowledgeable and a caring friend beside you...This valuable and compassionate guide is a must-have for anyone caring for a dog with cancer." -Modern Dog Magazine"Paw Turner...provides a full-spectrum approach to dog cancer care. Now in its second edition, the book covers conventional and nonconventional treatments, the 12 most common dog cancers,ways to analyze and develop a treatment plan with

your vet or oncologist, and 'True Tails' from readers of the book's first edition."-DogFancy magazine

The Dog Cancer Survival Guide is collaboration between two highly respected veterinarians. Dr. Demian Dressler, DVM is internationally recognized as "the dog cancer vet" because of his innovations in the field of dog cancer management, and the popularity of his blog, [www.DogCancerBlog.com](http://www.DogCancerBlog.com). The owner of South Shore Veterinary Care, a full-service veterinary hospital in Maui, Hawaii, he studied Animal Physiology and received a Bachelor of Science degree from the University of California at Davis before earning his Doctorate in Veterinary Medicine from Cornell University. Dr. Dressler consults both dog lovers and veterinary professionals, and is sought after as a speaker on topics ranging from the links between lifestyle choices and disease, nutrition and cancer, and animal ethics. Dr. Dressler is the co-founder of Functional Nutriments, LLC, a nutraceutical company, and is the inventor of Apocaps, the first clinical apoptogen formula. He is a member of the American Veterinary Medical Association, the Hawaii Veterinary Medical Association, the American Association of Avian Veterinarians, the National Animal Supplement Council and CORE. He is an advisory board member for Pacific Primate Sanctuary. He and his wife, Allison, live on Maui, Hawaii, with their dog, Bjorn, and their cat, Ginsu. Dr. Susan Ettinger, DVM, Dip. ACVIM (Oncology) is a staff medical oncologist at Animal Specialty Center in Yonkers, New York, and board-certified by the American College of Veterinary Internal Medicine (Oncology). After earning a BS in biology at Tufts University, she received a Doctorate in Veterinary Medicine from Cornell University. She completed her small animal medicine and surgery internship before joining the Department of Radiation Oncology at Duke University Medical Center in Durham, North Carolina, as a research associate and investigator in a five-year NIH program project grant. Dr. Ettinger was also an instructor in the Department of Molecular Medicine and an oncology associate with the Comparative Cancer Program at Cornell. After relocating to New York, she became a staff oncologist at Long Island Veterinary Specialists before rejoining Animal Specialty Center. She is well-known for compassionate, comprehensive cancer management with a focus on quality of life and palliative care. She and her husband, Kerry, who is also a veterinarian, live with their two sons, their dog, Matilda, and two cats, Jeter and Razi, in New York.

Great book! It really explained a lot. My 5 pound Chihuahua developed the worst type of cancer a dog can get . As of now through medication treatments she is considered cancer free, but she has three more months of treatment to go. This book hit the type of cancer my little girl has head on. The book gave me hope and peace of mind when my vet had given up on her. Cancer does not mean it

is a death sentence. I highly recommend this book to everyone who is facing and dealing with cancer with their beloved dog/kid. God Bless your dog. Esther H.

All the reviews I read convinced me to buy this book...anyone going thru this knows that it's horrible and any advice is appreciated, but as for the book, I thought it was just ok. I should write my own on my journey with Bullitt and his lymphoma.

I loved it and learned an awful lot about cancer in dogs by reading it. I thought I was well informed, until I read it. I was NOT well informed. MY dog Hudson, a GSD with a hemangiosarcoma with metastasis to the liver, died on the 2nd of January 2015. After reading that book any and every GSD I own, will get an X-ray of his or her belly to check the status of their spleen. Jenny, Hudson's partner, a female GSD was also found to have a tumor on her spleen. It turned out to be benign, but if it hadn't been found in time, would have ruptured and she would have bled to death. Again, I learned a lot about dogs and cancer. Thanks.

Very informative book. Clear and concise. Written for the layman to understand. Testimonies throughout book from other pet parents help you feel like you're not alone in this battle. Bought an additional copy for my Vet. He found it very useful too. Has a lot of resources to tap into. Would definitely recommend it for all pet parents and vets.

Fantastic book filled with great advice and everything you could need to know about supplements, your dog's particular type of cancer, and terminology. This book has it all! It even has a diet for those of us who home cook our dog's food. It is very easy to read also. This book is not filled with gloom and doom but with hope. It covers both conventional western medicine as well as holistic options. Nobody wants to have to own this book, but I am so glad I do. It is the only book you'll need for your dog's cancer.

My best friend was given a terrible scare with her guide dog of possible cancer. We set up an appointment with an oncologist and I went to work reading "The Dog Cancer Survival Guide" so that I would know what the doctor was saying when it came to what tests to do, possible results and possible paths to follow based on the test results. I took a note pad and wrote down questions and thoughts I had as I read. When we saw the oncologist, I was able to ask intelligent, clear questions that the vet complimented me on! She and my friend were relieved that I was there with the

knowledge this book provided me! I am so grateful that I had this book to guide me and most of all give me knowledge so that we were not going blindly into this unknown scary situation. Knowledge is power and peace of mind.

My dog Stella is my best friend in the world. She does everything with my fianc   and I -- walks, runs, swims, travels. She is absolutely a member of our family. When she was diagnosed with a cancerous tumor on her chest at age 6 1/2 (last fall), I could not stop crying for what felt like days. I am a very proactive person (I'm an attorney), and so I wanted to know about every possible thing I could be doing to maximize Stella's success pre- and post-surgery. This book gave me so many ideas and that knowledge made me feel a lot better. I have employed most of the dietary tips, and although some were too rich for Stella's body to handle, this book is loaded with HOPE which is exactly what I was looking for. I am happy to say that 5 months later, Stella is still cancer-free!

Some outstanding information, but I felt like I had to wade through way too much to get to it. Not a quick read!
