This dictionary packs a great deal of information in one compact small book. EXTREMELY handy for the size. If you need to carry a dictionary with you whether in the U.S.A or abroad this is ideal- that is for medical terminology. It does not have local vernacular used in different parts of Latin America or slang. It is a good solid formal Spanish. It includes vocabulary for different areas/fields of medicine that is a great basic tool to have. It has charts for parts of the body such as the heart and reproductive organs + more. The parts depicted in the charts are in English and Spanish. Some very basic questions i.e. how to ask a patient about their medicine and to instruct them on taking medicine + more. The back of the book is where the actual dictionary is English - Spanish and vice-versa. In many instances the words are translated and a word or two is expressed as to the

definition of the word. The print in the book is not terribly small as I have found in some dictionaries - But you will not need a magnifying glass to read this book either.

I love this dictionary. It fits perfectly in my scrub pockets and makes finding the words I need to communicate with my patients much easier than the larger dictionaries.

vocab divided into specific encounter types and also with most words listed alphabetically in the back. quick to use and extensive vocabulary.

I use this all the time at work, I'm a PA in family practice and this book saves me daily. Sometimes I just can't remember a word in Spanish or I need a picture of a body part to help me out...the answers are in my pocket! Highly recommend.

This is very comprehensive. I was looking for a quick reference guide for a recent medical mission trip to Panama, unfortunately this was too dense to quickly reference.

Very good! This book is very detailed. I would like a medical spanish laminated badge ID size of commonly needed spanish phrases as well. That would be even more handy and quick. Here are some suggested questions for that badge ID: 1 Hello/ Good Morning/ Good afternoon/ Good evening. 2. I am a nurse 3. My name is.... 4. Are you having any pain right now? 5. On a scale of 0-10 what level would you rate your pain? (0 -no pain - 10 -worst pain) 6. Where is your pain? 7. What kind of pain is it?- Sharp, stabbing, burning aching, throbbing, pressure, radiating?. 8. When do you feel the pain- is it constant, intermittent, or when you move? 9. How long have you had this pain/ When did this pain start? 10. Can you tell me your name? 11. Can you tell me where you are at right now? 12. Can you tell me what month /year it is? 13. Here is your medicine. It is for your..... 14 Heart, lungs, breathing, infection, pain, chest pain, cholesterol, blood pressure, heart rate, temperature, anxiety, depression, thyroid, GERD, to prevent blood clots, nausea, diarrhea, allergies

This is a great medical Spanish pocket book if you already have a good working knowledge of Spanish (had it High School/College AND remember it), but just need to know all of the medical terminology and phrases. I took it with me to Nicaragua on a medical mission trip which proved useful. I would take it with me again and possibly use it for a Spanish speaking patient who can't speak/understand English well.

One of the best medical Spanish books around. Very compact and great binding. Took it with me to Guatemala and it came in handy everyday! It has medical-specifics as well as a general H&P, diseases, drug names, everything you need. I can't rate this book high enough. I have absolutely no complaints other than I wish the pages were laminated.
