Age Range: 5 and up

Grade Level: Kindergarten and up

Customer Reviews

For over 35 years, School Zone has been an innovator in children's educational products. School Zone creates a wide range of educational resources to support every curriculum.

In reading the reviews, I have come to the conclusion that everyone is receiving something different. The set I received is missing cards and has different equations on the other side. A few other customers posted feedback that "their side" displays the answer. Save your money and time and download a free app on your phone! I have done this and there are wonderful apps out there that let you choose the function and what numbers (if you want to add by 1's and 0's, etc).

I said it for the Subtraction cards I got and have to repeat it for these Addition cards. Wow, I'm impressed with the results. My grand son is going into Kindergarten this Fall and wants to learn his math but hard to keep him involved for long. With these he will go through the entire deck, almost like a game, before 'finishing his homework' and losing interest. Amazing results make it well worth

it, cannot beat the price, and they are sturdy and will hold up for his use and that of his younger sister I am sure. Definitely recommend them.

We've been using them for a few weeks with my first grader. The only part I don't love about them is some of the 6's are in the glossy side and the rest are in the non glossy side so if you are isolating the 6's it's tricky find them all and keep them facing the right way. But that's a very minor problem that won't keep me from buying subtraction or multiplication when the time comes.

Great Cards for working with first grader.

There's a lot of missing cards in the box. The answer to the number is very small.

Great collection

This product was a bargain and served its purpose very well. I let my 2 sons whom are close in age play a game on who could say the correct answer the fastest. This encouraged them to learn the factors by memory which made it easier when doing homework

Very satisfied.
