Grade Level: Kindergarten and up

Customer Reviews

Lisa Trumbauer has written early-learner books for Scholastic's Jump Start series and published numerous other activity books, picture books, and novels for middle-school readers, including the New York Times bestseller A Practical Guide to Dragons.

My daughter hates doing "school work" but these books are at least a little entertaining. I think they help her practice better than she would in any other workbook you can buy on the market.

It arrived in perfect condition and sooner than we anticipated. My daughter likes it very much

because the exercises are age appropriate so she doesn't feel frustrated and gives her the right challenge. Also, it has some small stickers at the end of the book which are good to use as an incentive.

Repetitive to the point of boredom for my son. He likes some of the activities, even, but he is getting tired of doing them over and over. It's great for review and in conjunction with plenty of other stimulating activities.

This was perfect for getting my son ready for kindergarten and was a great base for helping my son in the future with school I was able to see how he learns and adapt my ways of teaching.

I used this book with my 5 year old she is almost done with it in less than a month, although is around 300 pages long. It's very easy stuff I think 1 grade one will be more challenging.

We really enjoyed using this book. It won't last all year - we are a month into school and more than halfway done with it. The science section is really lacking but I've been happy with the rest of the book.

This book is so fun for my daughter to use. She is in preschool right now and it is perfect for her. I plan on buying the 1st grade one for the summer before kindergarten. I feel like the books are off year in the labeling but they have fun and creative ways for your child to learn. I have bought a few other workbooks and this is by far that best one. My daughter asks to do the worksheets everyday.

Great for my 5 year old son. Lots of "work" for him while his older siblings do their homework. Now he doesn't feel left out.
