First of all, you are only considering this book because the main book was required by your professor/teacher. Textbooks always charge more to students for the same content found elsewhere. The main textbook has a shocking low amount of answers to the exercises. Each section offers only one solution or none at all. Very difficult to learn on your own if you don't know if you are doing it right, I had to rely on my professor going over it in class. This manual offers a lot more exercises to get good practice. However, the solutions are sold separately. Once again, the students are having to spend more money again. Doesn't stop there either. Many of the exercises require an audio CD. Open your wallet again. I feel like each individual part of this set is incomplete. You have to buy the whole set to learn anything. The chapter summaries are nicely organized in one spot that is easy to find. Many great exercises to work on. In regular manual format, so it is easy to write and work on. You can really learn the grammar part, big focus on that. Biggest negative with this manual and the main textbook is there is just very little translated words and sentences. Your grammar skills will be so much better than your translation. You have to look up every word you

don't know. This is German, so that is not enough to understand the meaning of the sentence as a whole sometimes.

The book wasn't exactly -new- so much as gently used; the first section was partially completed, but I'm in German II and didn't need that section anyway. :POtherwise, I appreciated how fast it was shipped and arrived, I was kind of down to the wire-- everything was due that week. I was very thankful it arrived in time! Thanks :)
