LURLENE McDANIEL

Synopsis

It's Christmas time, and Leah Lewis-Hall finds herself spending the holiday season alone and stuck in the hospital. Luckily, she quickly befriends her hospital roommate, a young Amish girl, and her close-knit Amish family. She becomes especially close to Ethan, the handsome and gentle older brother who can barely look Leah in the eye. When Leah receives frightening news about her condition, Ethan will show her that miracles can happen- and that sometimes angels appear in the most unexpected places. This nationally bestselling book is the first of three stories in The Angels Trilogy by Lurlene McDaniel.

Customer Reviews

I don't know why but I love all the books by this author. It could be that I am a cancer survivor and believe in miracles in my life. Some of the story's are said but proves that all things are possible with God.

I used to read her books when I was in middle school 15 years ago. This book was a good reminder of why I fell for her books as a younger reader. They're more meant for young readers, but for a quick adult read, they're still good.

Waste of time and effort.

Awesome read loved the series!!

Very well written for younger readers

I love this book and I hope who ever else reads this will love it too. I love Lurlene McDaniel books.

I have read this book a few times and each time I fall in love with it more and more. This book is about Leah a young 16yr old girl who breaks her finger but while at the hospital for xrays the doctors find something not right, So they admit her to the hospital in the meantime Leah's mom and new husband are on their honeymoon in Japan when they get the call about Leah. Leah's mother is in no hurry to get back. While in the hospital Leah gets a room mate whom is Amish. Leah isn't sure how she feels about them at first but then she opens up to learn more about them and talking with the little girl and her older brother and sister. In this book Leah learns about faith and love. When Leah gets told the worse news ever she isn't sure how to take it till she leans to faith and a special guest that visits her in the hospital. I would read this book yet again. 5 stars I am going to read the 2nd book in the set now

At the end of the book I felt it was kind of weird because of all that happened, it was just how she went through all the tests, how the doctors couldn't find out what was wrong with her through one test. I enjoyed the book because it was full of dialogue and just the story itself would have been totally boring if there was no dialogue because the dialogue made the story more interesting. That was something that kept my attention. To find out what every character would say after an event in the story. The dialogue was very effective between the characters and made them be way more believable. Dialogue lifts the words from the page. It is better to see what the characters in any book are saying back to their problems or friends or anything. My favorite characters in this book would probably have to be Leah and Rebekah because Leah was always brave no matter what and she was sweet to Rebekah. I liked Rebekah because she just seemed to be the playful joyous type of

person and I just liked it. Some of the characters were convincing and some weren't. I think the mother of Leah wasn't very convincing because instead of coming home for Leah because she was in the hospital, her mother stayed with her new husband on their honeymoon. Plus when she finally got to the hospital she was more important to believing that her daughter couldn't have what she was diagnosed with instead of caring for what her daughter did have. When the doctors couldn't find out what was wrong with Leah after the first couple tests I kind of wanted to find out what she had so that kept my attention but it also kind of made me feel like I wouldn't want to go to that hospital because it was weird how the doctors couldn't figure out what she had so that kind of lost my interest. After something is repeated a couple times it doesn't really hold any interest to me anymore. I didn't really learn anything from the story but it had a few different things. I think it wasn't based on learning something but more of believing what you want to believe. Like believing in angels and stuff. This book was in 1st person point of view. The plot of this story was about Leah being in the hospital and meeting Rebekah, Charity, Ethan, Molly, and Gabriella. It was also about the doctors quest for finding out what Leah's problem was with her mysterious aches in her finger and how it broke when she barley did anything to it and in the end they found the bigger problem and Leah's mother came. This story was sad in some parts and it wasn't really exciting but it was an ongoing story. Meaning like something was always happening but sometimes you couldn't predict what was going to happen. It was just a kind of book for people who like seeing something happening to a non-real person that could happen to anyone.
