the book itself is a very good book although i have seen some errors in the answers. for the most part it is a very good book for someone starting out with problem solving. a little direction in a few of the problems would be helpful as in the proper format to solve percentages, etc.

After using book A with our Math Intervention students in grades 5-6, we decided that it would also benefit the 7th and 8th intervention students as well. So we purchased books B and C. Really helps students determine "what the problem is asking me to do". Glad we are using them.
