Manual Of Neonatal Respiratory Care

Synopsis

The latest edition of this popular book covers the 'how-to' of respiratory care of newborns. Chapters from the previous edition have been updated to reflect advances in both equipment and practice, while newer chapters reflect the evolving worldwide approaches to neonatal respiratory failure, such as sustained inflation, optimization of lung volume, and the use of volumetric capnography, aerosol therapy, and management of chylothorax. New additions to the book also include chapters on assessment of large data bases, implementation of quality improvement programs in neonatal respiratory care, chronic ventilation of the baby with non-respiratory failure. The text also features case studies for self-review and is illustrated with high quality radiographic images, figures, tables, and algorithms. Written and edited by international experts, the Manual of Neonatal Respiratory Care, Fourth Edition is a thorough update and remains a convenient source of practical information on respiratory physiology, exam techniques, tips for performing procedures, radiography, ventilation, pain management, transport, and discharge planning.

Book Information

Paperback: 820 pages

Publisher: Springer; 4th ed. 2017 edition (April 8, 2017)

Language: English

ISBN-10: 3319398377

ISBN-13: 978-3319398372

Product Dimensions: 7.1 x 1.7 x 10.2 inches

Shipping Weight: 3.8 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #699,173 in Books (See Top 100 in Books) #136 in Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Pulmonary & Thoracic Medicine #170 in Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Critical Care #183 in Books > Medical Books > Medicine > Internal Medicine > Pulmonary
