## Customer Reviews

Chris Marshall (Sunbury, OH) is the author of dozens of books and hundreds of magazine articles on woodworking and home improvement. He is a contributing editor at The Woodworker's Journal.

I wasn't happy with my first review of this book so I took the time to reread it to see if it was me who was missing something. And boy I sure did. I am now very pleased to tell you that the book explains many aspects of how to start a roofing project and complete it no matter what kind of obstacles you find built into your roof. Chimneys, vents, flashing are all covered and I think this is a good book to learn from and I would recommend it to you.

Used to install a window in siding and for repairs to siding. Proved accurate, informative and helpful. Explanations are brief but clear and essentially complete. Anticipating additional future uses. Would certainly purchase again.

Great book.

Descriptions were right on, would definitely recommend. Never did siding before and put cedar shake up on my shorehouse and it came out beautiful.

Given that roofing is a pretty simple concept (but more difficult in prat ice), this book is very generic and does not contain a lot of tips for those difficult or uncommon situations that one can encounter on older houses' roofs. I bought it for the EPDM section and it was not helpful for transitions or flashing.

Good topics and great photographs. This book can be a great aid in roof repairs.
