UFOs, JFK, And Elvis: Conspiracies You Don't Have To Be Crazy To Believe

Synopsis

"I'm not asking you to believe every conspiracy theory you'll find in this book. . . . I didn't write this book to give you all the answers. The Warren Commission did that, and the answers were all wrong. I wrote this book to inspire you to do what the powers that be wish you wouldn't:Â Â to question authority . . . and to keep an eye out for Elvis."--RICHARD BELZERIn UFOs, JFK, and Elvis, the distinguished statesman of stand-up comedy tackles some of the biggest conspiracies and cover-ups this side of Roswell. Just what is it that they don't want you to know about the assassination of John F. Kennedy, Area 51, and what the American astronauts really found on the moon? The unexplained crash at Roswell and the mysterious "face" on Mars? The link between the Nazis and the U.S. space program? Evidence of extraterrestrial experimentation? Finally, one lone "nut" exposes the conspiracy to keep conspiracies a dirty little secret, standing up to the shadowy forces that would have us believe that Oswald acted alone, those lights in the sky are weather balloons, and fluoridated water is good for you (yeah, right). "Some of the smartest people I know . . . find it easier--and certainly more comforting--to believe that America is the only country on earth with no conspiracies at all." Just remember: do not ask on whom The Belz has told--he's told on them. --This text refers to the Paperback edition.

I must admit to being skeptical about this dubious title (when Elvis is mentioned, one could loose readers), but thanks to the sample system I decided this comedic investigator was anything but a Elvis "wing nut" and instead had done extensive research into the covert world of ours that has

twisted historical facts and been the hidden inventors of self-serving cover for crimes against the state in all manner of areas, from JFK's assassination to UFO's and the WW II, German intense work on achieving their own discs. Belzer laces his chapters with humor to lighten subjects that are anything but SNL material. He probes his topics that would elicit curiosity (hopefully) from the most skeptical cynics who shut their minds whenever a whiff of "conspiracy" is mentioned; that in itself is quite a self-serving trick to shield true "evil doers" from ever being made accountable for their crimes, plots/conspiracies that have countless, knowledgeable victims who could, if they didn't meet with impossible "suicides," brought light to who the perpetrators of treason, lies to cover false flag events, etc. that have marred our national reputation, lead to needless wars and a loss of our constitutional rights! Hopefully Belzer's book will lead the average person to at least entertain the ideas presented here and maybe investigate for themselves the curious facts that the press, for their own self-serving motives, have been complicit in promoting lies/ instead of truths to explain national, tragic events that have lead the nation in paths that could only be viewed as reprehensible. Maybe the all too compliant press who know the "straight skinny" yet assiduously cover for the villains are just as corrupt and evil as the dark doers they so loudly extoll as heroes!

Possibly the best book with all the FACTS of the JFK assassination, proving that LBJ, Nixon, and J. Edgar Hoover were all inside the planning of the murder of an American President. A silent coup d'État, never seen before in any government, and they pulled it off and fooled the whole country for 4 decades, or more. This is a MUST READ, and should be placed in every school in the nation. It's a part of history. And, it is all verifiable!

Interesting book. It just made me even more confused, though, over all the events that have taken place. Things could have happened his way, and they could have happened the official way. Deep in my gut, though, I have never been able to accept that Oswald could have been working all alone. And having him killed before learning more from him fits a conspiracy. Then his killer suddenly getting cancer and dying. It is a book that makes you stop and think. If you lived through all these like I did, you will probably wonder till you die if we know the truth or not about them.

I expected more from Belzer, who is an intellectual but tends to repeat the same stories over and over in this series.

Love the way Belz gives you the facts and where they come from on all conspiracies letting you

make your own decision. Love his books read them all!!!

Cures the curiosity around these incidences.

Great book. Gets you thinking.

Not a bad book. The second half is very "silly" with a smorgasbord of bizarre ideas with no substantiation. The first half of the book, all about JFK, is not bad. A short, easy, read. But the second half seems just dumb.
