Advances In Photodynamic Therapy: Basic, Translational And Clinical (Engineering In Medicine & Biology)

Synopsis

With today's focus on targeted and minimally invasive therapies, photodynamic therapy (PDT) is now being studied and used to combat many disease states and to investigate critical biological questions. This groundbreaking resource brings practitioners and researchers the latest advances in photodynamic therapy and offers a solid understanding of the design, delivery and dosimetry of the three basic ingredients of PDT - photosensitizers, light and oxygen. The book covers novel areas of mechanistic and innovative translational approaches. Moreover, it presents an overview of the important medical applications of PDT, including approved treatments, clinical trials, and investigated therapies for cancer and non-malignant diseases.

Book Information

Series: Engineering in Medicine & Biology

Hardcover: 559 pages

Publisher: Artech House Publishers; 1 edition (June 27, 2008)

Language: English

ISBN-10: 1596932775

ISBN-13: 978-1596932777

Product Dimensions: 7.2 x 1.4 x 10.1 inches

Shipping Weight: 2.6 pounds

Average Customer Review: 2.4 out of 5 stars 2 customer reviews

Best Sellers Rank: #3,073,409 in Books (See Top 100 in Books) #35 in Books > Textbooks > Medicine & Health Sciences > Medicine > Special Topics > Lasers in Medicine #50 in Books > Medical Books > Medicine > Lasers in Medicine #130 in Books > Medical Books > Medicine > Prosthesis

Customer Reviews

Michael R. Hamblin is a principal investigator at the Wellman Center for Photomedicine at Massachusetts General Hospital and an associate professor of dermatology at Harvard Medical School. He was trained as a synthetic organic chemist and received his Ph.D. from Trent University in England. He has published over 85 peer-reviewed articles, over 150 conference proceedings, book chapters and International abstracts and holds 8 patents. Pawel Mroz is a research fellow at the Wellman Center for Photomedicine, Massachusetts General Hospital. Dr. Mroz is currently conducting research in the area of Photodynamic therapy (PDT) - a new, cutting-edge approach for treating cancers and other diseases. Dr. Mroz is a graduate of the Medical University of Warsaw,

Poland.

not for the lay person

Dr. Hamblin and Dr. MrÅ z have produced the most updated and comprehensive analysis of Photodynamic Therapy currently available. From a student with little previous understanding of photophysics and photochemistry, this book is not only easy to understand, but also very interesting. I have learned quite a lot from this book.
