What The Moon Is Like (Let's-Read-and-Find-Out Science, Stage 2)

Synopsis

Imagine that you're walking on the moon. What is it like? For thousands of years people looked up at the moon and wondered about it. Now we know what the moon is like. There is no air on the moon and nothing grows, but there are towering mountains and deep craters--and much more! Colder than the desert, the hotter than the desert, the moon is an amazing place to explore.

Book Information

Series: Let's-Read-and-Find-Out Science 2 (Book 2)

Paperback: 40 pages

Publisher: HarperCollins; Ill edition (May 3, 2000)

Grade Level: Kindergarten - 4

Customer Reviews

Grade 1-3-This second update of a 1963 title (Crowell; o.p.) is clearly written and useful. Compared to the 1986 edition (HarperCollins), it has just one textual change: the mention of the discovery of potentially potable water beneath the surface of the moon. Visual differences include a cleaner font, a brighter cover, and watercolor-and-photographic illustrations. Three interesting activities are appended, including making a moon crater with flour, cocoa powder, and a marble. Ellen Heath, Orchard School, Ridgewood, NJ Copyright 2000 Reed Business Information, Inc.

"Excellent offerings for young ones beginning to read nonfiction."--"Booklist"
"Clearly written and useful."--"School Library Journal"

A GREAT teacher at a typically under-supported school needed reading materials for the students; it was VERY much appreciated...

Bought it for my grand son an he loved it. good science book for the young ones, very interesting...

I bought this for my preschool student. He loved it. The illustrations were great and the information was simply stated. The text was presented in a visually appealing manner with additional text boxes for additional information. We read it often.

Helpful

grandkids love it

I got this for my grandson and we enjoyed reading it together! He is six and it is easy for him to read.

good explanation, decent illustrations, and good science. I bought two of their other books which weren't quite as well done.

Great! Thank you!
