Color Quest: Extreme Coloring Challenges To Complete

Synopsis

Colorists, puzzle fans, and challenge seekers, take note: you will love this color-by-number book that is unlike anything you've ever seen before. Grab your colored pens or pencils and start coloring the numbered shapes—and in no time at all, you'll free the images concealed on the page. Your odyssey will take you on a magical journey to find artistic gems that are hiding in plain sight, including a mighty lion camouflaged beneath dots, a peacock prancing amidst hexagons, or a turtle masked by squares. Once you've completed them, perforated pages allow you to pull them out—making them perfect for decorating, framing, or giving as gifts. It's all just waiting to be liberated by you as you color each one, breathe new life into these pages, and uncover stunning and intricate works of art in your Color Quest.

Customer Reviews

“The Color Quest books from Barron's make for a nice coloring activity for detail-oriented people.”—[Geekdad](#)

Love this book! Has nice big pages, the numbers cover and don't show when colored over, the pages easily remove from the book. Nice thick paper, I used gel pens and the ink did not go through the paper!! I hope to find more like this book! Highly recommend!! I just started the dragonfly and will post pictures of what I have so far. Will post a close up so you can see how well the numbers cover.

There are so many things to love about this coloring book! I really like that the image reveals as you color it. Without turning to the back and seeing the finished images, it's virtually impossible to tell what you're coloring when you pick a blank page. This first book has a nice variety of images, from animals to people to buildings and bugs. I also love that this book is time consuming but not difficult. The pixelated images look incredible when they're completed. The pages are thick enough that I don't have to worry about bleed-through when using washable markers, and the pages are all single sided and perforated. Because the coloring areas are so small, the marker strokes from water-based markers are less visible than most coloring books, leaving the finished images looking a lot nicer than many other books. I've used water-based markers, fine-liner pens, gel pens, and Prismacolor colored pencils and they all look great in this book. My only complaint is that I wish there were a larger variety of geometric shapes to color. Most of the images are made up of triangles, with a couple pentagon, square, and hexagon images. There is only one image made from circles, and I'd have liked to see more of those as well.

It's been several decades - I won't tell you how many - since I've done color by numbers so I wasn't sure about this. Wow was I surprised how much fun I had, and some are very challenging. Good paper quality - but always use a blotter just in case :-). Also important to note the dimensions of this book. It's pretty big! Which can be great if you're a coloring addict like me, but if you have limited space to "work" in, then I would suggest verifying the dimensions. Overall this is an awesome book and a great twist to the classic coloring I've been doing for so long now. I recommend giving it a try and see!

This just arrived in the mail this morning. This book is amazing. Very relaxing and a good challenge. The shapes with numbers in them vary on size based on the picture drawing. This is not your typical sit down and finish in one sitting type of book. Although you can finish a page in one sitting, it will take a while. I have spent a while with this book already flipping through the pages and coloring in a few squares. So far I am really enjoying the book. The picture I have included gives you an example of the size of the numbers that you have to fill in. This is from the first page of the book. If you feel like relaxing and taking your mind off things for a while, this book is the book for you. Music on low volume in the background while coloring in this book is amazing.

I love how challenging and intricate the designs are. If you love to color (especially with hidden

pictures) and like to spend a long time on a page (like me) then you'll love this book. I don't like easy coloring pages so this is great. The numbers are small and you need to color under a light for best results. You get a lot of pages to color and while there is a key, I enjoy not knowing what I'm coloring until the picture reveals itself. I mostly use gel pens because each section is pretty small. But colored pencils also work on the pages with larger shapes. Enjoy!

Cannot get enough! Brings the fun back into coloring. While I enjoy normal coloring, I tend to stress way more than necessary over which colors to use. This takes the guesswork away. I love the mosaic style that keeps the finished product a mystery (if you don't look at the key). Pictures are big and intricate, and designs are mosaic-style with each picture featuring a certain shape (square, triangle, hexagon, etc). Paper is thick enough that I could see markers or pen not leaking through, but I use colored pencil. Make sure you have a wide selection of colors to try to keep the pictures close. I have 3 different sets of pencils (Crayola 50 ct, Marco Raffine 72 ct, and U Brands 48 ct) and I still have trouble matching sometimes. Numbers are very small and faint, which makes them easy to cover, but also sometimes difficult to read. Be sure to buy the animals book, the second in the series. Can't wait for more!

I love, love, love this book!! Unfortunately I have carpal tunnel so I have to take a small break from coloring in it, but I did get three pages done before I started hurting too bad. It is so much fun to see your coloring to start taking on a picture though and I really struggle to not look at the back to see what I might be making. My daughter tries to look at the back of the book too and I have to tell her no because I want to figure it out slowly. I really hope there are more of these coming out soon. I have seen similar ones, but I am afraid to order because I am not sure that they are the same as this one and I do not want to be disappointed.

This is so much fun!! I purchased this book out of curiosity because I love coloring and dot to dot books. I was pleasantly surprised. The paper size is big and the paper quality is one of the best I've used in these types of books. It's a relaxing and enjoyable experience to just sit down and spend some time working on one of these pages. Just don't look at the answer key in the back!!! It's so much more fun to be surprised when you are finished with a page!
