Customer Reviews

I just borrowed this book from my library yesterday and am half way through already! Fantastic book. It does have a "clinical" slant but this is great in my opinion. Research based, well written, and a positive beacon for struggling parents.

Book was rather disappointing as I respect the author. ADHD does not typically respond to rewards, charts, consequences, or "timeout" if kids are over the age of 8. Many authors like Barkley and R Green get that concept already. Not really any earth shattering information for those of us already deep in the trenches. Maybe good for those just diagnosed and starting the journey.
