Shipping Weight: 2.4 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 13 customer reviews

Best Sellers Rank: #155,405 in Books (See Top 100 in Books) #23 in Books > Science & Math > Earth Sciences > Mineralogy #41 in Books > Children's Books > Education & Reference > Science Studies > Nature > Rocks & Minerals #68 in Books > Science & Math > Earth Sciences > Rocks & Minerals

Customer Reviews

good and gave away to children that wanted it also

My son loves these quick study/class aids. I like that they are pre-punched and have a coating for them. My son likes them because they are very handy and he can usually find items he is looking for without having to flip through a text book.

Good alternative to spending lots of \$\$ at the bookstore on this same item.

This too is an excellent reference and quick study which arrived in perfect condition and on time. I love it!

This is a sturdy short summary of the major rocks and minerals that are most commonly studied. I like that it is plastic coated.

Its a very helpful tool. i use this for geology 101 and the professor was pleased with it. actually he laughed at it at first then checked it out and said, "hmm thats actually not bad" so there ya go, its not bad- says a Dr!

This tri-fold was great for geology class. Recommend to anyone studying rocks in minerals. Great information consolidated in one spot. Thanks.

Thanks
