Ovarian Stimulation

Synopsis

Ovarian Stimulation covers all the basic and advanced aspects of ovarian stimulation for women undergoing ovulation induction and assisted reproduction. It gives a comprehensive review of the modern approach to ovarian stimulation and its alternatives - both in IVF and in other areas of reproductive endocrinology where it is employed. The book is divided into six sections that cover mild forms, non-conventional forms, IVF, complications and their management, alternatives, and procedures. The chapters are clearly written and well illustrated, discussing a wide range of relevant topics, including the protocols of gonadotropin, oral agents for ovulation induction, aromatase inhibitors and surgical induction of ovulation, ovarian hyperstimulation syndrome, and alternatives to drug treatment. Written by leading experts on reproductive health and fertility, it will assist infertility specialists, gynecologists, reproductive endocrinologists and radiologists in determining their patients' treatment.

Mohamed Aboulghar is Professor, Faculty of Medicine, Cairo University and Clinical Director, The

Egyptian IVF-ET Center, Maadi, Cairo, Egypt. Botros Rizk is Professor of Obstetrics and Gynecology, Director, Division of Reproductive Endocrinology and Infertility and Adjunct Professor, College of Allied Health, University of South Alabama College of Medicine, AL, USA.

I have been looking for an up to date book to collect all the ovarian stimulation regimens and what cons and pros of each regimen,, I have not found any book to provide this until I brought this book. It is so organized a lot of illustrate diagrams to simplify the info. I always wanted to see what the IVF doctors do to stimulate the ovaries to successfully apply this on my patients. I need to follow the guidelines as much as I can in treating my patients, and I am so happy to buy this book finally I can be confident with all what I am doing with my patients. I used this book also while studying for my exams of OBGYN infertility section. I learned a lot of evidence based knowledge all through my residency training in OBGYN.

Very nice and accurately informed book
