Recording Historic Structures

Synopsis

This new edition of the definitive guide to recording America's built environment provides a detailed reference to the re-cording methods and techniques that are fundamental tools for examining any existing structure. Edited by the Deputy Chief of the Historic American Building Survey/Historic American Engineering Record, this revised edition includes in-formation on recent technological advances such as laser scanning, new case studies, and expanded material on the docu-mentation of historic landscapes.

Book Information

Hardcover: 320 pages

Publisher: Wiley; 2 edition (December 1, 2003)

Language: English

ISBN-10: 0471273805

ISBN-13: 978-0471273806

Product Dimensions: 8.6 x 0.9 x 11 inches

Customer Reviews

The Historic American Buildings Survey (HABS), Historic American Engineering Record (HAER), and Historic American Landscapes Survey (HALS) work to preserve important structures, not physically, but through documentation—precisely measured drawings, photographs, and written records. This Second Edition of Recording Historic Structures offers a detailed reference to the methods and techniques used to document America's historic structures, from bridges and buildings to landscapes and ships. This new edition of the definitive guide provides information on the latest technological advances being used in practice—such as laser scanning, CAD, and digital-rectified photogrammetry—and state-of-the-industry case studies, including new material on recording landscapes. Packed with everything necessary to study and document any existing structure, this thorough guide discusses initial survey and planning, field notes, historical research and analysis, photographs and measured drawings, and all other aspects of documentation. Complete with a list of helpful Web links for further research, this Second Edition of

Recording Historic Structures is a reliable resource for designers and engineers who work with historic structures.

JOHN A. BURNS, FAIA, is a deputy chief and principal architect of HABS/HAER/HALS. He has lectured and written extensively on topics related to historic buildings, including the technologies of architectural and engineering documentation. HABS/HAER/HALS are part of the National Park Service, U.S. Department of the Interior. The programs document important architecture, engineering structures, industrial sites, and landscapes throughout the U.S. and its territories. The HABS/HAER/HALS collections are archived at the Library of Congress and are also available at <http://memory.loc.gov>.
