Behind The Claw details the Spinward Marches, a complete sector of space. Over four hundred star systems are described in detail, along with essays on the Imperial Nobility and system of government, a detailed history of the region, referee's information, current events and a wealth of adventure material.

A nice sourcebook on the Spinward Marches. Much has been written about the Spinward Marches for other versions of Traveller, but this comprehensive sourcebook is a great go-to book for those of us with too much Traveller stuff to sort through, and a great starting place for those new to the Traveller universe.

Traveller is in my opinion the best developed sci-fi setting ever. The Spinward Marches in the Reign of Emperor Strephon are the default time and place, the setting where everyone goes back to sooner or later. They are the heart of Traveller. Traveller is an RPG in a heroic setting like a traditional space opera. It is medium level sci-fi, not "hard"(as realistic as can be) or "soft"(mostly romantic) . There is plenty of room for derring do and so on, but the derring do is made believable

by the incredible work gone into drawing up the setting. Though little known, I believe Traveller is a work of genius and can be compared with Dune in complexity and surpasses almost any other work ever written. The Spinward Marches are a vast hostile border between the Third Imperium and the Zhodani Consulate, a semi-civilized area of wars large and small. Here you can find worlds that are the pinnacle of wealth and technology, and backwater worlds where nature still holds sway. This volume gives an encyclopedic description. From the political structure to the numerous business interests, to the various races and ethnic groups that inhabit the region, as well as history both recent and ancient. Added to this are short descriptions of every planet in the region. For any Gamemaster planning a campaign here there is more than enough. And for those like me that don't play but simply devour information for its own sake there is more than enough. The information here can suit for an epic campaign, or a low key adventure or anywhere in between. For those starting into Traveller Behind the Claw is one of the best volumes they can get.

This module covers the spinward marches sector in detail. This is the region of traveller universe where most adventures were designed for along the almost 30y of the game existence. The sector has been covered twice before. First in a classic traveller module in the usual UWP (universal world profile) database without much detail. Second as an appendix of megatraveller Library data, also in a UWP database. Now SJ games covers them in detail giving a small text for each planet yet allowing many mysteries for each game master to develop his own adventures. Also detailed are the major politics between the states and the corporations of the region. The versions differ from each other in world profile and even frontiers, but that is easy to be solved by the Game master. It's an excellent book lacking only a colored map in the old traveller style. This can be done by buying Megatraveller boxed set, which unfortunately is rather rare to find. Hopefully someone at SJ games will read this review and solve this...
